Attachments: Asbestos SNUR Draft Final Rule V2 for RCS.docx

Thank you, Robert.

The version of the FRN that RICS should be using is attached, which I uploaded to RICS's Sharepoint site <https://usepa.sharepoint.com/sites/OCSP/Community/RCS/Lists/FRN/NewItem.aspx?ID=1848> a couple of weeks ago. This is the only version that has the FRL number added, so if you come across a document where the FRL at the top of the page is highlighted yellow, you will know you are in an older version. When I did the document compare redline strikeout proposed v final for OCSP IO and when I did the document compare this morning for Brian and Tanya, this is the version of the draft final rule I used. That way, when we have to provide changes to RICS, we all have the same version, I hope.

Lea

Hi Lea- I am happy to handle asbestos (including providing comment to RAD on the RE) but would like your help getting the right FRN version to RICS as it is still not completely clear to me how this version control is being kept straight. The rest I can handle if you need to jump on your new priority chemical.

Subject: Balancing workload this week

Good morning Erik and Robert,

Sorry for all the emails this morning! I had hoped that the Asbestos SNUR would be off our plates by now, but since it is not, I'd like to propose the following plan for addressing my conflicting priorities:

1. I have still not started on my chemical's regulatory history, which is due Friday, but that date seems a bit arbitrary. I'd like to have until next Tuesday if that is okay with you, Erik.
2. I'd like to work on the risk evaluation today so the two of you can look it over again tomorrow (if you have time).
3. I can help address any comments from Brian and Tanya today on the Asbestos SNUR, but after today, I'd prefer to limit my task list to the following:
 - a. Pdf the Response to Comments document

b. Upload the references in FDMS

- i. Robert, you will need to complete the docket certification form, which I've partially filled out for you on SP

We are still waiting for the RICS version of the FRN and approval of the funding request. All the edits we have made will need to be transferred redline strikeout to the formatted FRN from RICS. I had offered to do this last week, but since we are behind schedule, I don't know that I have time this week. With the doc compare version I sent out this morning, that should be an easier basis for making the edits, but we should probably talk to the editor to see if he would rather just redo the formatting at this point.

Also, I will be on leave April 18-23.

Should we discuss?
